WIND FARM POWER GRID

PCG Wind and partner UPI are committed to superior customer service in the energy industry and in wind farm projects.

FOR YOUR WIND FARM PROJECTS: SUBSTATIONS, T&D, AND COLLECTOR SYSTEMS

PCG Wind and strategic partner, UPI, together provide a comprehensive menu of top-quality services, matched by superior customer service and value. Our capabilities include, but are not limited to large-capital transmission, distribution and substation projects, whether it be routine, complex hot work or storm related recovery.

We complete electrical installations of any type and size, from high-voltage transmission to low-voltage controls, switching for isolation and recovery, capacitor banks, Y and Delta systems.

Construction and maintenance of high-voltage transmission lines, substations, underground and overhead distribution systems up to 765kV.
