ANOTHER RESOLUTION-MINDED INNOVATION BY PCG FOR YOUR WIND BUSINESS

Using a PCG proprietary program called Manpower Tracking System (MTS), PCG Wind unites with you to improve accuracy of manpower data and facilitate reporting and analysis of manpower resources, thus reducing errors and hours spent generating and submitting hand written manpower service reports.

24/7 access to review work site profiles, job status, employment trends, certifications, skills, training information.

Crews record time worked and information about tasks completed. Management is able to track the work done by each employee, and generate reports about employee activity and the tasks worked on by PCG teams.
